- Battery voltage: 1.5 V V
- Operating time on battery: 12 hr hr

Product highlights

Volume control
A handy rotary control sets the volume to the ideal level to suit your preference.

Sound-level lights
Sometimes its a great help to 'see' when your baby makes a sound. This row of lights provide you with a clear visual indication.

Adjust Microphone sensitivity
Possibility to set the sensitivity of the microphone so you only hear the sounds you want to hear.

Range in open air
In the open air with no obstacles, the safe distance between the baby unit and parent unit is greater than indoors, so you can take the parent unit with you into the garden or to the neighbour's house without loosing contact.

Number of channels
A choice of channels significantly reduces the risk of interference or sounds from other baby monitors in the neighbourhood.

Analogue Pilot Tone
A special tone that is transmitted along with the audio signal minimizes the chance of interference from other wireless appliances.

Battery-low indication
To know in time when the batteries need to be recharged or replaced.

System check
When interference is detected in the communication link between the baby unit and parent unit or if the signal is too weak, the visual and audible alarms will be activated.

System check alarm
The parent unit gives an audible alarm when it is outside the communication range of the baby unit or when the communication link is not reliable.

System check light
Green light on the parent unit lights when the connection between the baby and the parent unit is reliable and flashes when the parent unit is outside the range of the baby unit or when the communication link is not reliable.

Two AC power adapters
With the two AC power adapters, you can use both the baby unit and parent unit on the mains power to save on batteries.

Use in & around the house
Rest assured that as you take the parent unit with you as you move in and around your house, the parent unit will stay in touch with the baby unit. It keeps you reassuringly informed and able to respond quickly when baby calls.

Extra small Parent unit
The parent unit is very small, so that you can put it easily in your pocket or clip it to your belt. Easy to take with you when you move around the house.

Portable parent unit
With the adjustable belt clip, you can easily take the parent unit with you, wherever you go.
